PROFILE

Ahmed Alsakkaf, From Yemen 🇾🇪

I'm in my third year and set to graduate in 2026.
I have a passion for building websites and mobile applications, and I'm continuously learning and expanding my skills in software development.

SKILLS

HTML, CSS, Bootstrap, SASS, JavaScript, java, python, C++, WordPress, Digital Marketing (SEO, SEM, Email Marketing, Ads), Content Creating, Video Editing, Figma.

PROJECTS

Hospital Management System

This is my second semester project, in which I and my other two classmates developed a management system for a hospital management system using java language and the PF as well as OOP concepts within. It's desktop application system, and it is run on the command line.

E-commerce System

I created an E-commerce system for selling Yemeni & Pakistani traditional clothes and accessories. It is my Fourth semester project, and I used wordpress to create that along with using different Digital Marketing techniques

1. SEO.
2. Social Media Marketing.
3. Email Marketing.
4. Advertising using Google ads.

For running a successful businesses.

Car Rental System

This is my fifth semester project which is a frontend car rental system for the web technologies course. I used HTML, CSS, bootstrap, and JavaScript to build that web application.

Other Projects

Along my journey of learning, I have developed and created different projects and applications according to my interests some of them are:

1. Portfolio.
2. To-Do-list app.
3. QR code generator.
4. Youtube video downloader.
5. User Interfaces for different web applications.

and many more interesting projects you can find them in my github account. github.com/AhmedAlsakkaf
